

copy and resize image python

```
1 from PIL import Image
2
3
4 # Image.open() can also open other image types
5
6 img = Image.open("some_random_image.jpg")
7
8 # WIDTH and HEIGHT are integers
9
10 resized_img = img.resize((WIDTH, HEIGHT))
11
12 resized_img.save("resized_image.jpg")
```
